

Bill of Material & Production Order (BOMP)

If your business is distribution and/or light manufacturing, you need a bill of material processor that can eliminate the headaches of organizing and managing inventory and assembly levels. You need Elliott's Bill of Material Processor module.

With Elliott's Bill of Material module, users will be able to easily enter production work orders and back flush the materials. In addition, users can capture the production structure and add, change and delete components. It also captures variance that may occur during the production.

Warehouse Management

Warehouse management is essential in every business. Maintaining your warehouse efficiently will increase operation efficiency and help sales order fulfillment.

Elliott Business Software offers powerful warehouse management functions to help your company achieve these goals. Elliott's Warehouse Management System is a powerful solution that will help automate your inventory handling process. Also, it is key to your order fulfillment process. Elliott offers various barcode printing and scanning solutions, including real time inventory management through a portable wireless Tablet PC device.

Customer Relationship Management

Elliott offers a built-in Contact Management System. Features such as Notes, Tickler/Task Manager, Attributes, eContact Manager, eContact Processor, Mass Email, Links, and many more will help your company improve your relationship with your customers.

You do not have to utilize a third party contact management application. Everything is fully integrated within Elliott Business Software, which means data is easily accessible because it comes from one source.

You can keep track of your customer contacts, send email to your customer contact records, email order acknowledgements, email shipment notifications (with tracking information) and more, all within the same application.

Supply Chain Management

Improve your supply channel with Elliott's Supply Chain Management features. Use Electronic Data Interchange (EDI) to process Purchase Orders, Invoices, and Advance Shipping Notifications (including UCC 128 Labels).

Elliott's Internet Solution offers customer order status and tracking numbers online. Elliott's Remote Sales Order Taking allows you to take orders at trade shows. Elliott's Shipping Management provides shipping manifest integration with third party solutions and shipment confirmation emails to notify customers of delivery.

Elliott's Available to Promise (ATP) provides for a real time MRP (Material Requirements Planning) solution. Track incoming and outgoing inventory and accurately determine inventory on hand and more.

Elliott Internet Solution

As the developers of the Elliott Business Software application, we have extensive knowledge regarding back-end business applications, but it doesn't stop there. We have designed and implemented major e-Commerce and e-Business websites that link directly to the Elliott back-end application.

Through the development of these websites, we were able to gain the expertise for ASP, ASP.NET, Visual Basic, ActiveX, Web Services, IIS Server, and more.

Our knowledge of the Internet and business applications can guide you through all your e-Business and e-Commerce planning to help your company utilize the power of the Internet effectively.

If you require a more sophisticated e-Commerce/e-Business solution that integrates to the back-end Elliott application, consider our Internet Solutions: eStore.NET, Yahoo Store Integration, eOrders.NET and Reseller Near You Search.

Business Software

The Elliott Solution

If you are looking for accounting software, think again! You need business software that goes beyond the traditional accounting tasks and integrates Enterprise Resources Planning (ERP), Supply Chain Management (SCM), Warehouse Management, Customer Relationship Management (CRM), Internet eCommerce and eBusiness solutions.

Choosing which business software will drive your company now and into the future can be vital to your company. So, whether you are upgrading your current accounting system, right sizing or downsizing from a mini-computer or main frame, your investment in this business software should meet and exceed your current financial management needs.

Elliott Business Software is a powerful, feature rich ERP application that is affordable by businesses of every size. Elliott is an Internet ready business solution that includes General Ledger, Accounts Receivable, Accounts Payable, Payroll, Bank Book, Inventory Management, Customer Order Processing, Purchase Order & Receiving, Bill of Material Production, with emphasis on Supply Chain, Warehouse Management and Customer Relationship Management.

Proven Technology

Elliott is a Windows 32-bit business software based on PSQL database and runs on a Local Area Network or Single User environment. Elliott offers extensive support for Terminal Server, which makes it ideal for organizations with multiple locations.

Affordable Pricing

Elliott offers solutions in Accounting, Distribution, Light Manufacturing, Customer Relationship Management, Supply Chain Management, Warehouse Management, and e-Business/e-Commerce. Instead of pricing by module, Elliott offers per user-based combo pricing that results in an extremely affordable entry point price for its base solution.

Supported Platforms

Elliott supports most 32-bit Windows operating systems including Windows 98/ME, Windows 2000 and XP Professional. It supports server platforms for Windows NT 4.0, Windows 2000, Windows 2003 and Novell NetWare.

Elliott Modules

Systems Manager (S/M)

Users can run multiple sessions of Elliott and customize screen look and feel easily. Powerful printing and archiving functions make the paperless office concept possible.

Unlimited notes provide for easy reference throughout the system. Flexible and powerful CSV file import functions make everyday operation convenient and efficient. Production, sales, and purchase order personnel can take advantage of the powerful yet easy to understand MRP tool to create forecast orders, planning orders, actual orders, and more.

General Ledger (G/L)

Stay on top of your company and ahead of your competition with the backbone of your accounting system. Elliott's G/L lets you pull vital facts from multiple accounting modules to generate complete financial statements and reports. It will also work with F9 Financial Report Writer to provide ultimate flexibility in generating and analyzing your financial data in a spreadsheet.

Accounts Receivable (A/R)

Accuracy is a critical element in managing your accounts receivables. Elliott's A/R simplifies cash management and maintains vital credit information that empowers you to analyze your customers' performance so you can collect your company's receivables quickly.

That means you can focus on growth and expansion while maintaining a solid financial base.

Accounts Payable (A/P)

Timing can be everything in Accounts Payable. Achieve that all-important timing, as well as increase cash flow management, by implementing Elliott's Account's Payable module. A comprehensive accrual module, you'll save time by streamlining all your vendor accounts. You can input numbered vouchers to track new payables, credit memos, prepaid expenses, cancellations and adjustments.

Payroll (PR)

If you employ people, then you have a payroll system you must manage. It is vital that the data be accurate and secure. Achieve total confidence by implementing Elliott's Payroll module.

Bank Book (B/B)

Elliott Bank Book is a cash management system that integrates all your cash-related accounts and transactions for quick, organized reporting and reconciliation. This module helps you better track your cash position so you can make knowledgeable and timely decisions for your business.

Inventory Management (I/M)

Managing inventory levels is critical for extracting and analyzing data to efficiently control your company's budget and resources. You will find Elliott's Inventory Management module provides you with a comprehensive tool that records and maintains both manufacturing and distribution inventories for multiple warehouse locations.

Customer Order Processing (COP)

Processing your customers' orders demands more than just order entry, it requires the power and flexibility inherent in Elliott's Customer Order Processing (COP) package. Accompanied by Elliott's Accounts Receivable and Inventory Management modules, COP streamlines every step of your order processing.

Purchase Order & Receiving (P/O)

Organize and administer your company's purchasing process to decrease time invested in paperwork and increase efficiency. You can do just that with Elliott's Purchase Order and Receiving module.
